

GONA.PUJYA LAKSHMI

Email: lakshmipujya@gmail.com

Mobile no: [6304525549](tel:6304525549)

Address: Bandar Road, Vijayawada-520007, Krishna District, Andhra Pradesh

Career Object:

To obtain a challenging position as a Software Engineer, where I can apply my technical and design skills to contribute to the organization's success while continuing to learn and enhance my own capabilities. Motivated and detail-oriented B. Tech graduate specializing in Artificial Intelligence and Machine Learning, seeking an entry-level opportunity to apply my skills in Python, AI, Machine Learning, Deep Learning, software development, and data analysis. Eager to contribute to organizational success by solving real-world problems, building practical solutions, and continuously learning and adapting to emerging technologies.

Education:

Vijaya Institute of Technology for Women (JNTUK), Vijayawada, India

B. TECH (Artificial Intelligence & Machine Learning)	May-2025
--	----------

Narayana Junior College, Vijayawada, India

Intermediate (MPC)	April-2021
--------------------	------------

Ravindra Bharathi (E.M) School

SSC	June-2019
-----	-----------

Skills:

Programming languages:

C, Python, Java Basics

Web Technologies:

HTML, CSS, JAVASCRIPT, SQL

Achievements:

- Completed **Python Programming** course in **Infosys Springboard**.
- Participated in **Project Work – Savishkar 2022**.
- Took part in **Cultural Activities** during school events.
- I done my internship on **Cyber Security**.

Projects:

1.Title: Deep Learning for face recognition using AI Powered Solutions with CNN

Keywords: Authentication, Deep Learning, Dlib, Face Detection, Face Recognition, Face Net, Lighting Variations, Liveness Detection, Multi-Factor Authentication, Pose Variations, PostgreSQL, Real-Time, Security, Surveillance, Web-Based Interface.

Description: Developed an AI-powered facial recognition system using Python, OpenCV, and Flask to detect and identify individuals from images and real-time video streams. Implemented deep learning models (Face Net/Dlib) for accurate facial feature extraction and matching against a structured database

(SQLite/PostgreSQL). Designed a user-friendly web interface for image upload and real-time recognition. The system supports applications such as attendance management, access control, and security surveillance. Addressed challenges like variations in lighting, pose, and occlusions, with scope for future enhancements including liveness detection and multi-factor authentication.

2.Title: Drug Sales Analysis Dashboard

Keywords: Power BI, Power Query, DAX, SQL, Excel, Data Analysis, Data Modelling, Data Cleaning, Data Transformation, Data Visualization, KPI Tracking, Dashboard Development, Sales Analytics, Revenue Analysis, Profit Analysis, Customer Analysis, Trend Analysis, Business Intelligence.

Description: Developed an interactive Power BI dashboard to analyse drug sales performance, revenue, profit, customer demographics, and sales trends. Cleaned and transformed data using Power Query, created data models and relationships, and used DAX to calculate key KPIs such as revenue, gross profit, profit margin, MoM and QoQ growth. Designed dashboards for top/bottom product analysis, customer analysis, and trend analysis to provide actionable insights and support data-driven decision-making.

Strengths:

- Self-Confident
- Good Communication Skills
- Easily interact with people
- Self-motivated

Hobbies:

- Reading books
- Listening to music
- Travelling
- Learning new skills

Languages:

- Telugu
- English
